

EARLY ACCESS PROVISION

Changes in Colorado law, resulting from House Bill 1021 (2008), allow school districts the choice of offering the opportunity to identify and serve highly advanced gifted four-or-five- year old children who require comprehensive academic acceleration through Early Access to either Kindergarten or First Grade. It is the intent of the law that Early Access is not intended for all children who are gifted, but rather that there are some children for whom Early Access is an appropriate educational decision. Children for whom Early Access is being requested must either be four years of age by the state date for Kindergarten-October 1) or five years of age by the state date for first grade (October 1).

A 4 or 5 year old child who may benefit from EA is considered a "highly advanced gifted child". Highly gifted is defined in this bill as a child who is academically gifted, socially and emotionally mature, and scores at the 97th percentile or higher on tests of cognitive abilities and achievement. This child is in the top 2% of the gifted peer group, motivated to learn, ready for advanced placement, and has exhausted the resources of quality preschool programs or home schooling.
